February:2026	*Level: 3ASLLE*	*Duration : 1h*
	SECONDTERM ENGLISH TEST	

Read the text carefully then do the following activities

A/Comprehension 7pts

Read the text carefully, then do the following activities:

Corruption is changing with time and technology. Today, **it** is no longer limited to simple bribery or favoritism. One new form is AI and algorithmic corruption, where artificial intelligence systems can be programmed or manipulated to favor certain people secretly. Another growing type is group-based corruption, which spreads through social networks or peer influence, making dishonest acts seem normal within groups.

The financial and technological sectors are now major targets of corruption. Digital banking, cryptocurrency, and online transactions make it easier to hide illegal money. There is also state capture, where corrupt leaders change laws and institutions to protect **their** interests and weaken control bodies.

Procurement corruption continues to evolve. Governments use digital platforms for public contracts, but some people still use **them** to win deals unfairly through hidden agreements. These new forms of corruption are more complex and harder to detect because they often appear legal or technical.

Understanding these trends helps societies fight corruption in smarter ways. It shows that modern corruption can hide behind technology, law, or influence — not just money or gifts. Countries must ensure transparency in both human and digital systems to protect justice and fairness.

1) Choose the right answer.

The text is about :a) the old forms of corruption b) the digital economy c) the newest types of corruption
