The Second Term Exam

Text

Earth SOS

Pollution is a big problem **which** faces countries all over the world . Every day, cars, buses and factories emit large amount of smoke in the air. Consequently, the air becomes polluted and people suffer from respiratory related diseases such as : asthma.

Water is also polluted when factories throw their waste and poisonous chemicals into rivers and seas. So a large number of sea birds and fish are killed and become extinct also water become dirty and unhealthy to drink.

The average family throws 2 tons of rubbish every year. That's about the weight of an elephant! If we don't recycle more, all the landfill sites will be full and we'll soon have nowhere to dump all the rubbish.

Every year, we destroy an area of forest the size of New York State. Trees are very important; they provide oxygen and homes to many different species. If we continue cutting down forests, we'll also lose plants that we can use to make medicine.

The earth is our home and without **it** we have nowhere to live. We must save it urgently. We must follow 3 simple rules; Reduce, Reuse, Recycle .

We need to act now !
